AI-BASED CLASSIFICATION OF GEMSTONE'S AUTHENTICITY AND ORIGIN

GÜBELIN

CSEM AT A GLANCE

We are a public-private,
non-profit, Swiss
technology innovation center

We enable competitiveness
through innovation by
developing and transferring
world-class technologies to
industry

LASTING CUSTOMER IMPACT THROUGH

Applied research: We develop next-generation technologies with the potential to transform industries and improve people's lives

Tech transfer: We customize and develop new products, processes, and services with our clients that address their unique needs

THE DIGITAL "SUPER-EXPERT" PUTTING GEMSTONES UNDER THE MICROSCOPE

Determining if a gemstone is authentic and what it is worth requires years of experience and extensive specialist knowledge. CSEM has partnered with Gübelin's Gem Lab in Lucerne, CH, to finalize work on a high-performance AI authentication solution. In the future, this digital "super-expert" will work together with human experts to analyze gemstones.

WHAT DEFINES THE VALUE OF A GEMSTONE?

Origin!

sold at auction for
US\$ 6,900,000

(same stones from **Madagascar**:
below US\$ 1,000,000)

Bracelet with nine sapphires
from **Kashmir**

WHAT DEFINES THE VALUE OF A GEMSTONE?

Treatments!

Weight: 5.14 ct
Species: Natural ruby
Origin: Burma
Sold for: **US\$ 600'000**
Condition: Untreated

Weight: 5.62 ct
Species: Natural ruby
Origin: Burma
Sold for: **US\$ 30'000**
Condition: **Heated**

BUILDING A GEMSTONE SUPER-EXPERT

R&D

Español Français
 By Serge Maillard
 MARCH 2021

Far greater volumes of gemstones, evaluated automatically? This is the promise offered by Swiss jewellery house Gübelin, which has joined forces with CSEM to develop a revolutionary data processing tool using artificial intelligence and machine learning. This new technology also opens up some exciting prospects for the watchmaking industry.

FAKE OR FORTUNE: UNCOVERING THE VALUE OF GEMSTONES

The gemstone industry is a treasure trove of sparkling allure and brilliant worth, making gemstones a unique and valuable investment. To understand gemstones' financial value, experts must first accurately identify and authenticate them. Professional gemstone authentication is a long-established process, and it can take up to six years to train a gemologist in the trade's intricacies, including determining a gemstone's type, origin, or possible treatment.

Today, the **Gübelin Gem Lab** uses Gemtelligence, the artificial intelligence (AI) technology it developed in collaboration with CSEM in its authentication processes to complement its human experts. Gemtelligence uses deep learning models trained on multiple data sets to help Gübelin's experts determine gemstones' identity,

PERFECT QUALITY!

DEEP LEARNING FOR INDUSTRY

Quality & Process Control

- 2D/3D inline inspection
- Multimodal data
- Data driven optimization

Predictive Analytics

- Machine health monitoring
- Predictive quality
- Complex system modelling

Cognitive Robotics

- Smart human-robot interaction
- From sensing to awareness
- Agile, customized production
