

curriculum vitae:

Pierre-Yves Fonjallaz (Innosuisse)

Pierre-Yves Fonjallaz obtained his PhD in Physics at EPFL in 1995 with a thesis on the photosensitivity of single-mode optical fibres. He then spent 23 years in Stockholm working initially at the Royal Institute of Technology (KTH) and for the Research Institute of Sweden (RISE) in different positions. He coordinated the collaboration in photonics between the two organisations from 2003 to 2009. He created a consulting company in 2010 to encourage municipalities around Stockholm to develop professional distance-working environments and reduce commuting. He founded and led the national platform PhotonicSweden from 2011 to 2018. He moved back to the Léman region in 2018 and is presently working with collaborative European projects at the research office of EPFL and for Swissphotonics.
