

Plastic Optoelectronics in the Upper Rhine Area OPERA Cluster Formation

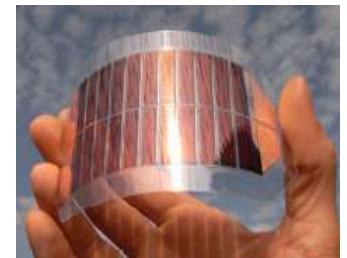

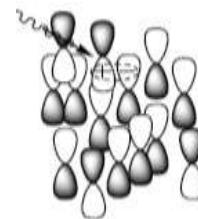

Dr Carsten Winnewisser

Senior Manager Business Development

CSEM

Neuchâtel, Switzerland

carsten.winnewisser@csem.ch

Plastic Optoelectronics Workshop, Basel, 25.06.10

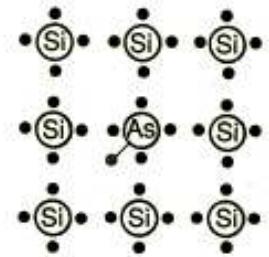

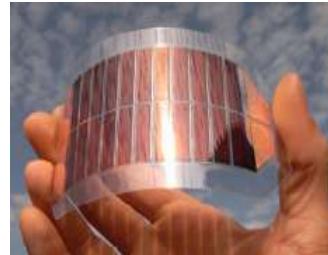

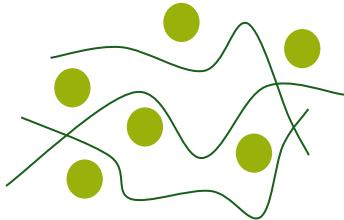

Goals

- “Crosslink” the stakeholders in the domain of “Plastic Optoelectronics” / “Organic and Large Area Electronics (OLAE)” in the border triangle Upper Rhine Area
- Trigger cross-border cooperation along the value chain / foster the potential of this Metropolitan Region
- Trigger the formation of a “Plastic Optoelectronics” Cluster in the Upper Rhine Area

"Definition"

Plastic Optoelectronics / Organic Electronics Printed Electronics / Polytronics / OLAE

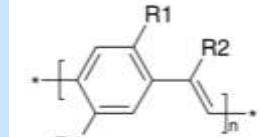

- is a branch of electronics that deals with conductive polymers, plastics, or small molecules. It is called '**organic**' electronics because the polymers and small molecules are carbon-based in contrast to classical silicon-based electronics.

Plastic Optoelectronics

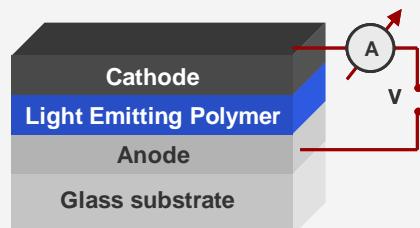

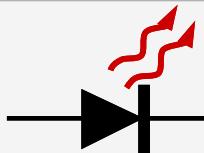

Small Molecules

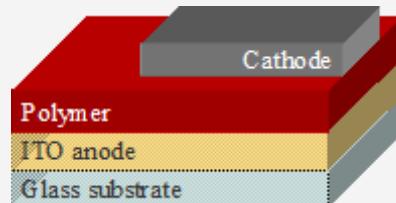

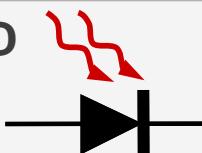

Polymers

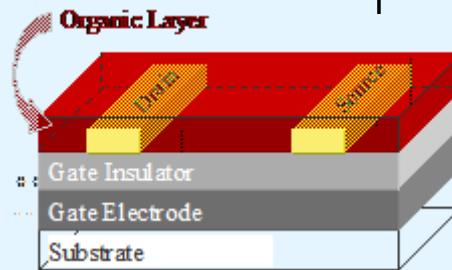

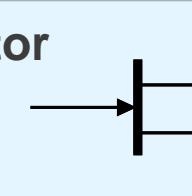

LED

PV-cell / PD

Transistor

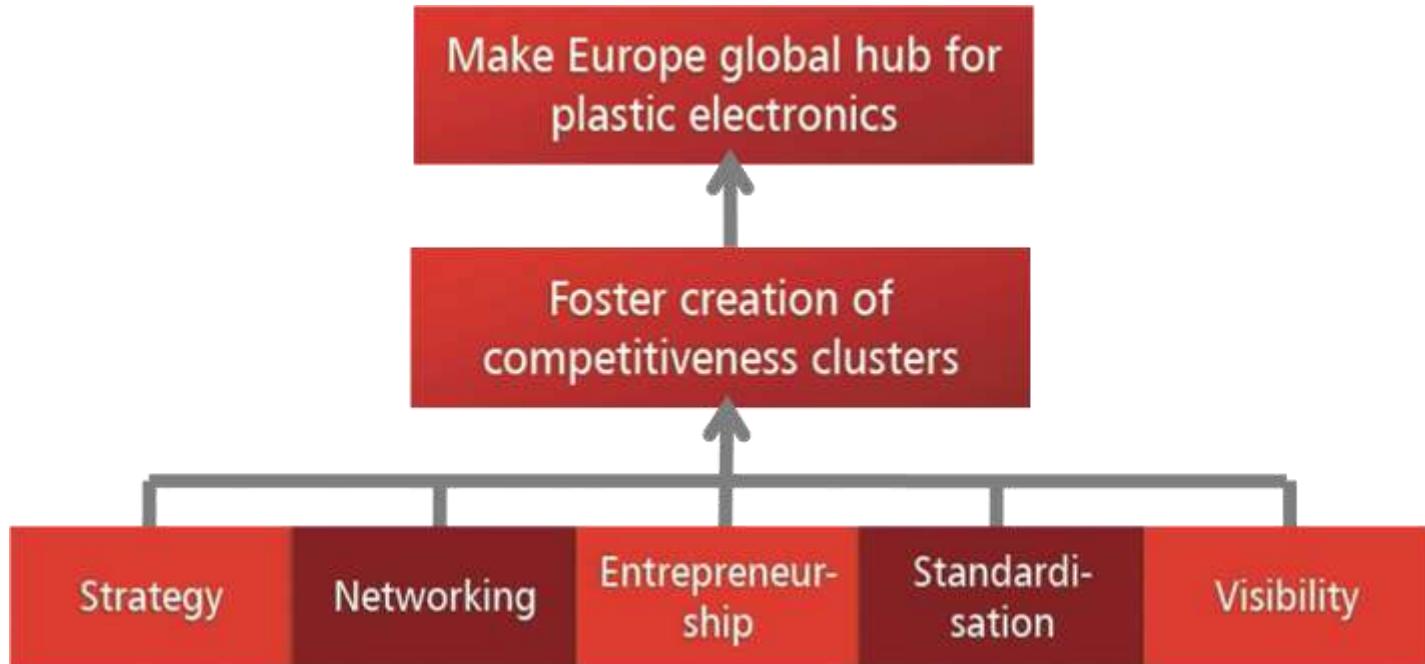

Plastic Logic

Motivation for an European Strategy

- General lack of coherent long-term strategy for OLAE in Europe
- Fragmentation, duplication and discontinuity of research efforts
- Limited coordination of European and national funding activities
- Lack of investments
- Shortcomings in the technology transfer process
- Entrepreneurial training

Objectives of OPERA

Cluster

A cluster is a geographically proximate group of companies and associated institutions in a particular field, linked by commonalities and complementarities.

- Key components for the emergence of clusters:
 - Specific higher education hubs
 - Best-of-class academic research groups
 - Best-of-class research institutes
 - A coherent network of businesses covering the entire value chain
- These factors facilitate and encourage partnerships

Geographic hot spots

Hot Spots for Organic & Printed Electronics in Europe

- Oulu

Announcements

- International Simulation Workshop
“Organic Electronics & Photovoltaics”
30.06. 02.07.2010, Winterthur @ ZHAW [\(www.isw10.org\)](http://www.isw10.org)
 - FSRM-Course:
“Polymer Optoelectronic Technologies and their Applications”
09.09.2010, Basel @ CSEM [\(www.fsrn.ch\)](http://www.fsrn.ch)
 - OPERA & oe-a workshop “Towards standards in the OTFT domain”
14.09.2010 in Dresden @ oe-a working group [\(www.oe-a.org\)](http://www.oe-a.org)
 - Dreiländerkongress “Bildung, Forschung, und Innovation”
02.12.2010, Basel @ Kongresszentrum [\(www.regbas.ch\)](http://www.regbas.ch)

WORKSHOP Sessions

Workshop Session I

“Stakeholder Survey in the Upper Rhine Area”

Core Topic	Round-Table-Moderator
Materials	Prof. Günter Reiter (University of Freiburg)
Design/Characterization	Prof. Beat Ruhstaller (ZHAW)
OPVs/DSCs (Energy harvesting)	Dr. Frank Nüesch (EMPA)
OTFTs/Molecular (Electronics)	Prof. Bertram Batlogg (ETHZ) / Dr. Paul Seidler (IBM)
OLEDs (Lighting, Displays)	Dr. Tilman Beierlein (CSEM)
Sensors/Integrated Smart Systems	Dr. Carsten Winnewisser (CSEM)
Encapsulation/Substrates	Dr. Emilie Galand (Huntsman)

Stakeholder Survey (Who is Who)

- Applications ⇔ Processes
- Value Chain

Workshop Session II

Afternoon

- EU-Objective ICT-2011.3.6
“Flexible, Organic and Large Area Electronics and Photonics”
(G. Nisato)
- Cluster Formation & OPERA-II
(A. Stuck & C. Winnewisser)

Thank you for your attention!

1. Objective

Opera proposes to coordinate the work of academia and industry in organic & large area electronics [OLAE]. The overall objective of this project is to strengthen the position of Europe as the leading force in OLAE in the world.

Europe is in pole position due to a number of factors such as its strengths in research & technology, the strong position in materials & processing, concentrated R&D activities carried out in European academia & research institutes, the first printed electronics factories already established. Europe is also leading in areas like e-paper, printed RFID's, first rollable displays, first printed sensors and first printed interactive games.

The specific objective of the Opera project is to create the conditions for the establishment of a number of coordinated competitive clusters in the EU.
