Excellence in nutrition, health and safety

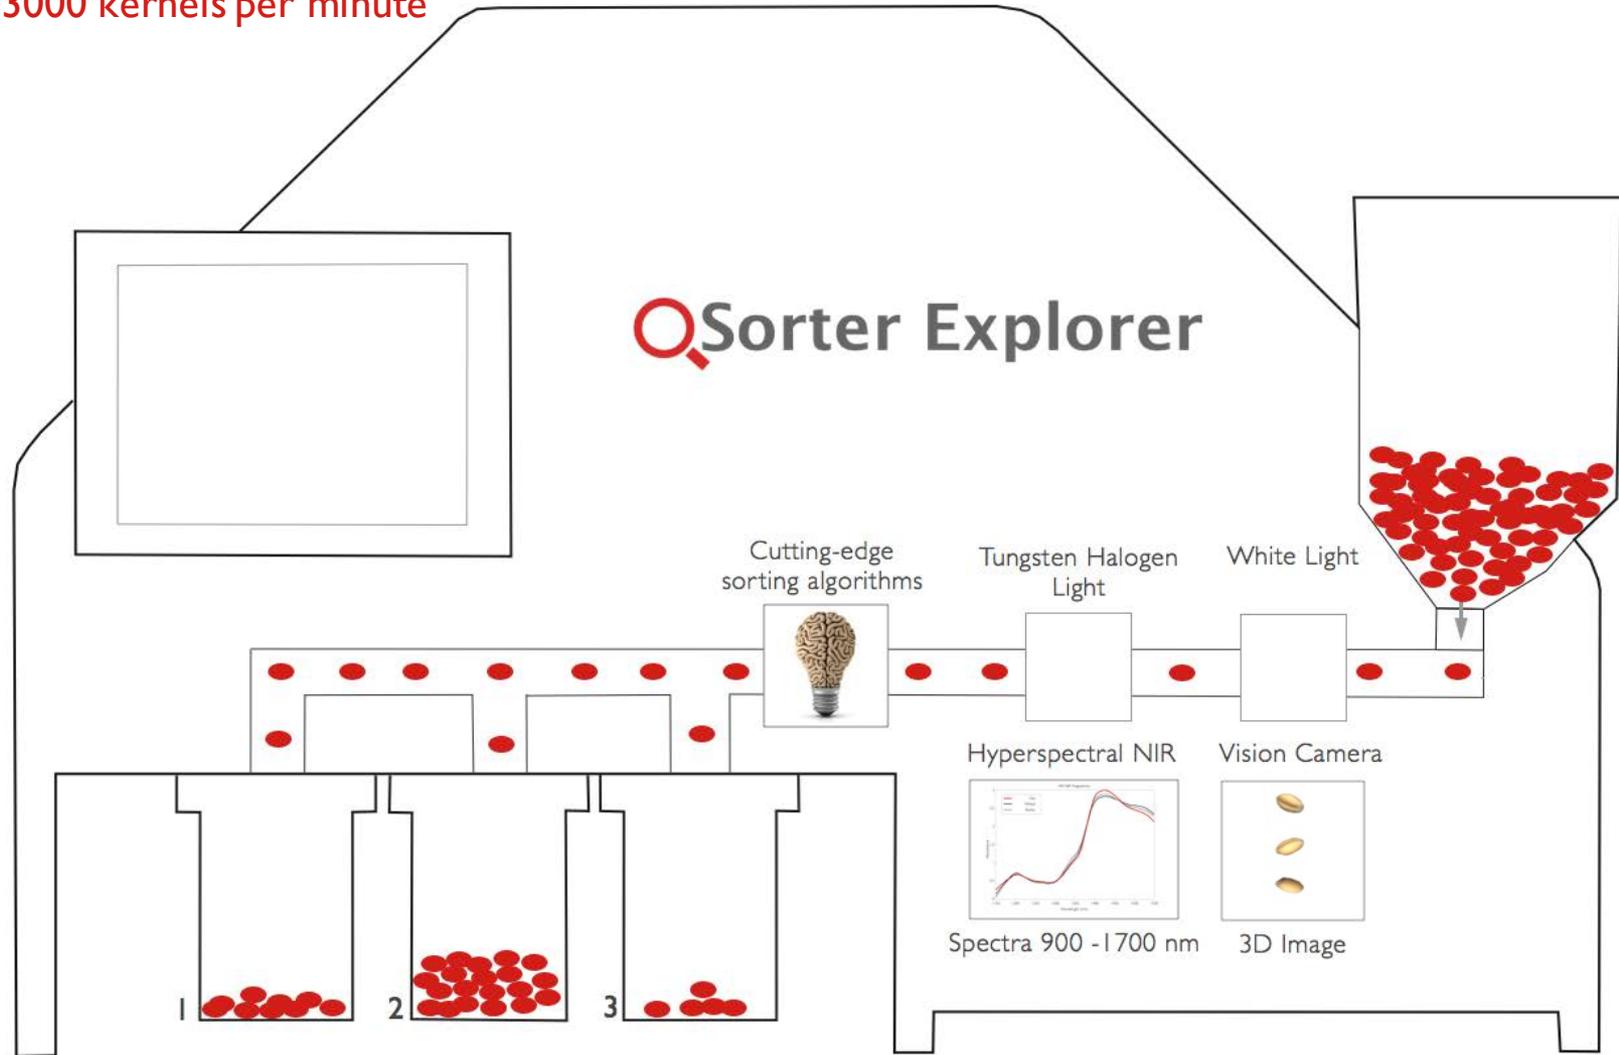

We commit to bringing excellence in
nutrition, health and food **safety** to
people all over the world.

One-by-one analysis and sorting of grains...

Up to 3000 kernels per minute

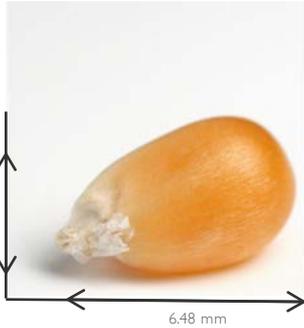

...by their physical **and** biochemical properties at once

INSECT DAMAGE

BROKEN KERNELS

GEOMETRY

DISEASES
(FUSARIUM)

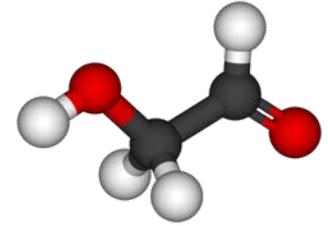

IDENTIFY IMPURITIES

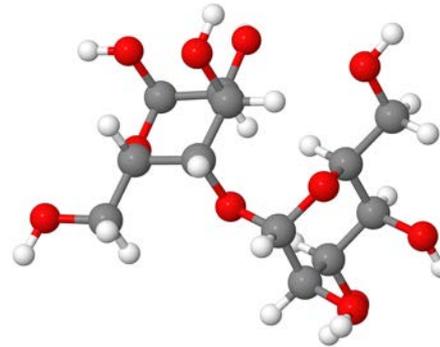

VARIOUS COMPOSITIONAL PROPERTIES

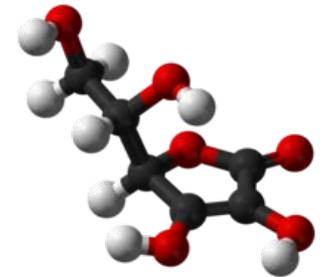

FATTY ACIDS

PROTEIN FRAGMENT

ANTIOXIDANTS

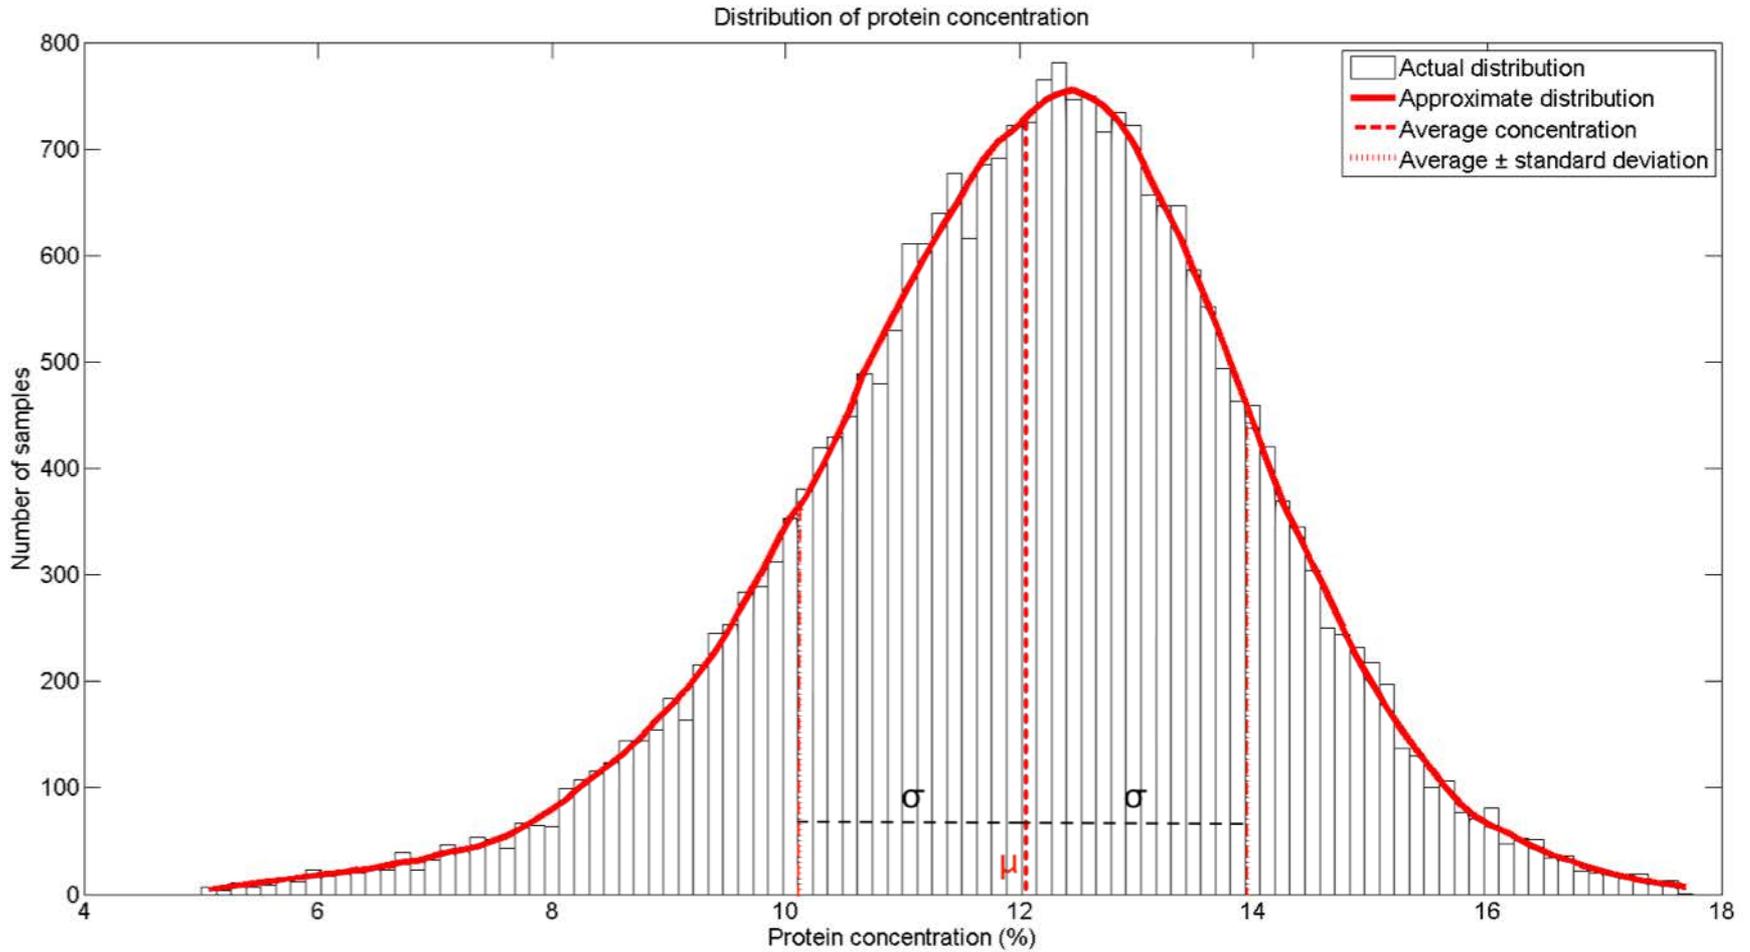

3D image – wheat kernel

NIR spectra for oat, wheat and barley

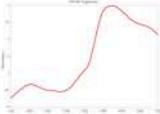

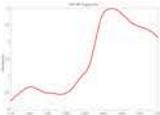

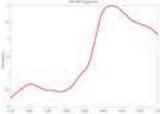

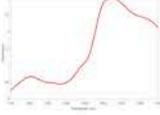

we acquire information for the entire batch...

...and for **each** individual grain

QSORTER EXPLORER

Laboratory device for quality control

- Single grain analysis
- Near Infrared Spectroscopy
- 3D Imaging
- Parameter distribution
- Easy to operate

- Speed: 3000 kernels/minute
- Multiple criteria sorting
- Accurate pneumatic sorting
- Large samples

How is being used ?

Process Monitoring

Breeding & Product Development

IDENTIFICATION OF GLUTEN CONTAMINANTS IN OATS

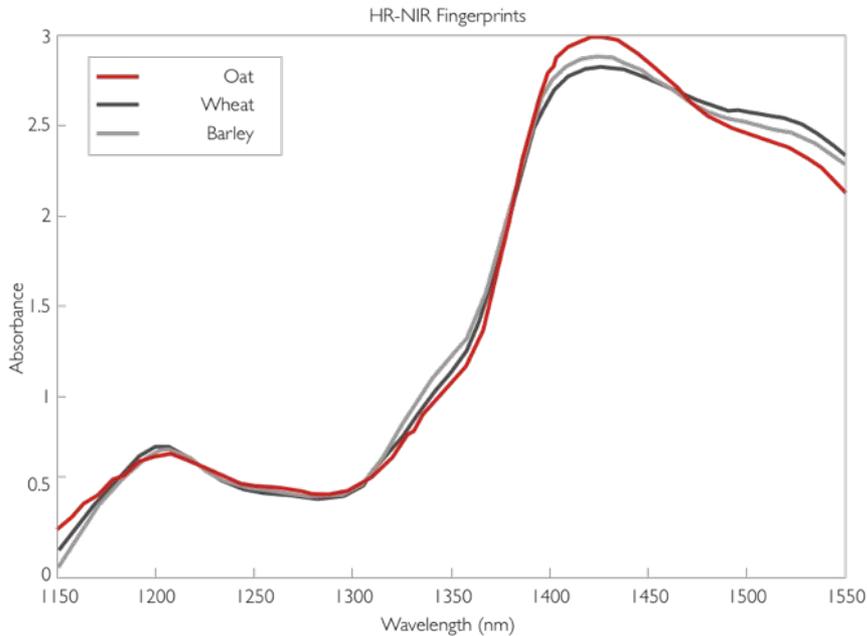

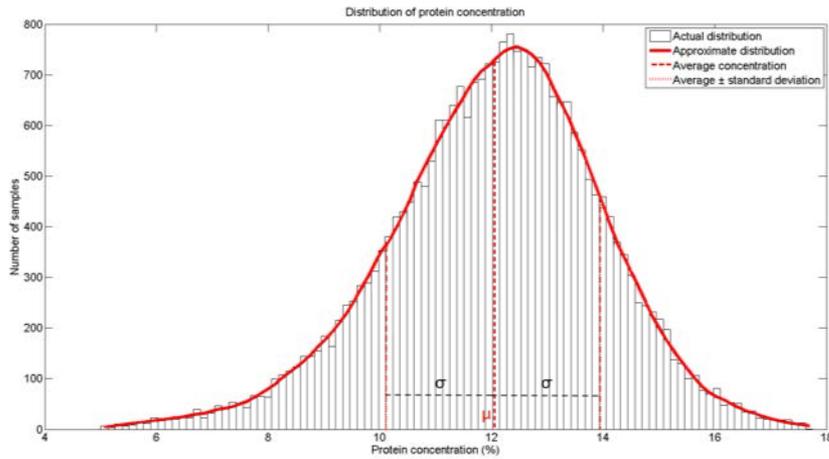

**malabsorption
osteoporosis
risk of lymphoma
autoimmune diseases
iron deficiency**

...

Manual Inspection	R5 Elisa Test	QSorter Technology
Subjective assessment	-	> 97% accuracy
Risk of human errors	-	Automatic process
250 g/h	Very small samples	Up to 5 kg/h
Low repeatability	-	99% repeatability
	Destructive	Non-destructive
	4 hours per test	Testing & sorting in the same time
	Specialized personnel	Easy to use
	Fully equipped lab	No additional equipment needed
		> 97% accuracy in identifying contaminants
		> 95% accuracy in identifying oats
